Mystery

Fortune Teller

Directions

Cut this panel off along the dotted line to make a square.

Fold the square diagonally into a triangle. Then fold the opposite ends of the triangle into a smaller triangle.

Open up the paper with the light yellow side up.

Fold a corner into the center and repeat for each of the three remaining corners. You will end up with a square.

Turn the paper over. Fold a corner into the center and repeat for each of the remaining corners. You will end up with a smaller square.

Fold the square in half. Unfold and fold in half the other direction.

Unfold and pull the four ends together. Work your fingers under the four square flaps so you can move the four parts of the fortune teller.
